

Self Contained Breathing Apparatus Fit Test

A-034

Date: 02-08-1999

SCBA Fit test Procedure

Attached is the New York State Office of Fire Prevention & Control recommended method for conducting a SCBA fit test. This procedure has been adopted by the Union Vale Fire Department and is to be performed as written. Following this procedure will provide the wearer with the correct mask sizing, and introduce the approved procedures for donning and testing the breathing system prior to each use.

The wearer will be advised of the danger of atmospheres that may be hazardous to life as found in general firefighting operations.
